City St. Petersburg

Education

ITMO University
Faculty of Secure Information Technologies
2023-present

Trajectory Astrophysical School
A series of courses in programming (Python), physics, mathematics and astrophysics
2020-2023

Additional education

- Scientific work on the study of infrared ring nebulae, 2023-present
- The bonus-track program "Data Analysis Methods" from the Graduate School of Digital Culture at ITMO University, 2024-2025
- Participation in the forum and hackathon on the use of generative media Science media AI 2024
- The course from the Yandex Academy and the Higher School of Economics (HSE) on the Stepik platform "Introduction to Programming (C++)", 2022

Projects

- Mini-project "Pulsar Catalog" in Python
  - Creating a database and implementing work with it
- ADI-a method for solving algebraic Riccati equations in C++
  - Implementation of a class of matrices and linear algebra operations
  - Development of a heuristic algorithm for calculating the shift parameters of an iterative method
  - Solving a multiparameter problem
- Secure Data Transmission Channel Mode (Python)
  - Implementation of cryptographic protection (AES-128, SHA-256) and error-correcting coding

Skills

- Programming languages: C++, Python, C
- OS: Windows and Linux
- Knowledge of algorithms and data structures
- Databases: database design, SQL (experience with PostgreSQL)
- Knowledge of the basic principles of information security technologies and information protection methods
- English (Upper-Intermediate)
